## wireless aluminum keyboard with backlight

Aluminium  
+ Bluetooth  
+ Backlit

---

= Awesome

We took Apple's iconic aluminium keyboard as a starting point, and built from there...

### Full-size in beautiful aluminium.

Available in *Silver* and *Space Gray*, Apple fans now have a full-size Bluetooth keyboard that's *backlit*, matches the look of their system, and feels great to type on.

### Wireless with a number pad.

If you like Apple's wired keyboard with numeric keypad but wish it were wireless, this is the one to get (especially if you need/want backlighting).

### Rechargeable 1-year battery life — for Bluetooth.

No expense was spared to make this the best Bluetooth keyboard possible. That includes putting a *much* bigger rechargeable battery in it than we had to — 1,600 mAh.

That's 5x to 12x bigger than what's inside most other wireless keyboards; big enough to last a year, on a single charge.

## Backlighting done right — 2nd dedicated battery.

Most backlit keyboards stop working if you use the backlight too much, running the battery dry quickly — VERY inconvenient.

For this reason, we have a 2nd *separate* rechargeable battery ***just for the backlight***.

So, you can use the backlight as much as you like. If the backlight runs dry, the keyboard will still continue working off its own separate battery — for up to a year.

The backlight battery should last 1 to 2 weeks between charges, in normal use.

## Pairs up to 4 Bluetooth devices — Mac, iPad, iPhone, Windows, or Android.

It may look like a Mac keyboard (and it is) but the Matias Wireless Aluminum Keyboard can do a few extra tricks...

You can pair up to 4 Bluetooth devices, easily switching between them with the press of a button, and the keyboard adjusts its layout to match each device (as you switch) — whether it's Mac, iPad, Windows, Android, etc.

## Mac-friendly function keys.

Just like an Apple keyboard, the function keys let you control screen brightness, volume, iTunes, and more.

There's even an Fn key, that lets you momentarily change the function keys back to their traditional duties, when you need them.

## Stays on. Stays connected.

Other wireless keyboards will often power down and disconnect to conserve battery life — leaving you waiting, *each time* they reconnect.

With its BIG battery, the Matias Wireless Aluminum Keyboard doesn't need to do that. It stays on, and stays connected.

These simple luxuries — not having to worry about batteries, no waiting to reconnect — make it feel more like a wired keyboard.

## Specifications

### In the box:

- Keyboard
- Charging cable (USB)
- Users manual

### System Requirements:

- Mac or PC with Bluetooth
- Mac OS X v.10.6.8 or later (for Mac function keys)
- iPad
- iPhone or iPod touch
- Android 3.0 or higher

### Dimensions:

17.35" x 4.58" x 0.8"  
(44.1 x 11.6 x 2 cm)

### Cable Length

3.25 feet (1 m)

### Weight:

1.4 lbs (636 g)

### Warranty:

1 year limited warranty ([more info](#))

### Key Travel Distance:

2.0 mm

### Keyboard Battery:

1,600 mAh (3.7 volt) 5.92 watt-hour rechargeable lithium-ion polymer battery

### Backlight Battery:

1,400 mAh (3.7 volt) 5.18 watt-hour rechargeable lithium-ion polymer battery

### Rechargeable Keyboard

#### Battery Life:

1 year between charges (typical use)

#### Uninterrupted Typing Time:

533 to 1,600 hours between charges (varies depending on typing speed, indicator lights, etc.)

#### Standby Time:

2 years between charges

### Rechargeable Backlight Battery Life:

Backlight battery life varies depending on brightness level, typing patterns, rest breaks, etc.

#### Typical Use:

1 to 2 weeks between charges (assumes backlight off in daylight, half-brightness for evening use, and intermittent typing)

#### Maximum Brightness:

6 to 7 hours between charges

### Keyboard Layouts Available:

#### Silver
